PROFESSIONAL SUMMARY

System and Software Developer with experience in infrastructure automation, backend engineering, and scalable distributed systems. Skilled in CI/CD, Linux, REST APIs, network and security automation, and cloud-native development. Currently pursuing a Master's in Artificial Intelligence at BTU Cottbus with a focus on VR- and EEG-based systems.

LANGUAGES:

- Arabic (Native)
- French (Fluent)
- English (Fluent)
- German (Conversional)

TECHNICAL SKILLS:

- **Backend & Systems:** Laravel, Django, NestJS, Rest-APIs
- **Programming:** Python, Golang, TypeScript, JavaScript, PHP, Java
- **DevOps & Tools:** Linux, Bash Scripting, Docker, CI/CD, Puppet, Ansible, Git
- **Databases:** PostgreSQL, MySQL, MariaDB, MongoDB, SQLite, S3
- **Testing:** Cypress, PHPUnit, Pest
- **Frontend:** Vue.js, React, Angular, Bootstrap, Tailwind
- **Monitoring Tools:** Zabbix, Elasticsearch
- **AI Tools:** PyTorch, SciKit
- **EEG Research Tools:** EEGLab, BCILab, Matlab, LSL

EXPERIENCE:

- **Working Student, System & Software Developer, IONOS** (Nov. 2023 - Today)
 - Developed and maintained internal and customer-facing systems and dashboards
 - Automated network and security processes to reduce manual workload
 - Integrated and maintained REST APIs in distributed environments
 - Executed automated end-to-end tests using Cypress
 - Supported CI/CD, deployment, and infrastructure automation
 - Contributed to scalable backend and infrastructure projects
- **Full-Stack Software Developer, Hello Delivery** (Jul. 2022 - Apr. 2023)
 - Built multiple web applications to optimize internal business operations
 - Developed dashboards for customer service and HR management
 - Created a global partner and service management system
 - Implemented a company-wide data analytics system
- **System & Software Developer, Adex Technologie** (Feb. 2022 - Jul. 2022)
 - Developed an AI- and IoT-based intelligent data center monitoring system
- **System- & Software Developer, Hello Delivery** (Aug. 2021 - Nov. 2021)
 - Built and automated a driver billing system integrated with fleet management
- **Full-Stack Software Developer, Halkorb RH** (Jul. 2021 - Aug.2021)
 - Processed JSON data to build a multi-user dashboard for company-wide data visualization

EDUCATION

- **Master's in Artificial Intelligence, B-TU Cottbus** (Apr. 2023 - Today)
 - **Thesis:** Relaxation Decoding in Virtual Reality Environments
- **Master's in networks & Embedded Systems, University Algiers 1** (Sep. 2020 - Jul. 2022)
 - **Thesis:** Intelligent Data Center Monitoring using IoT and AI (with Adex Cloud)
- **Bachelor's in Computer Systems, University Algiers 1** (Sep. 2017 – Jul. 2020)
 - **Thesis:** Development of a Learning System
